Upper Murray Regional Library had a mobile library built to specifications by Specialised Vehicle Manufacture in 2005. The quality of workmanship, the professionalism of the company and the communication to us throughout the build was of the highest standard.

The mobile library was launched in August 2005 and it has been a huge success with all of our members and also with the 8 member Councils of Upper Murray. The salespeople of the truck sales company through whom we purchased the DAF cab chassis were very impressed with the library pantec build and it has caused a lot of comment throughout the 62 communities it serves.

To add further weight to this testimonial - Upper Murray Regional Library has now received funding to build a second mobile library and SVM will be building this mobile library for us.

Lynne Makin  
Chief Executive Officer  
Upper Murray Regional Library
